

OPTIMIZATION TECHNIQUES FOR INVERSE PROBLEMS I

Modena, Italy, 28 - 29 April 2008

OIP2008

Aims and Scopes

The workshop will provide both extended talks held by international experts in numerical optimization and inverse problems, and shorter presentations, all concerning theoretical and applied aspects of optimization techniques, with particular attention to related developments in specific inverse problems as image restoration, compressive sensing, and machine learning.

Invited Speakers

Mario Bertero, Università di Genova
Silvia Bonettini, Università di Ferrara
Roger Fletcher, University of Dundee
Elena Loli Piccolomini, Università di Bologna
Hans Mittelmann, Arizona State University
Stephen Wright, University of Wisconsin

Location

Dipartimento di Scienze Fisiche,
Informatiche e Matematiche
Università di Modena e Reggio Emilia
Via Campi 213/b, Modena (Italy)
